Underage Drinking Prevention Materials

NIAAA has developed materials specifically addressing the problem of underage drinking. These materials may be ordered in quantities for school and other educational programs.

“With So Many Things to Do, No Wonder Most Kids Choose Not to Drink.” Aimed at middle-school underage drinking prevention programs, the selections in this colorful poster’s vending machine represent the many activities kids can choose to do instead of drinking. The poster directs students to the National Institute on Alcohol Abuse and Alcoholism/Substance Abuse and Mental Health Services Administration’s adolescent drinking prevention Web site at www.thecoolsquad.gov.

“Make a Difference: Talk to Your Child About Alcohol” is a research-based guide geared to parents and caregivers of young people ages 10 to 14. Research shows that parents have an enormous impact on their children’s behavior. This booklet covers a number of topics, from strategies to prevent underage drinking to recognizing the warning signs of a drinking problem. The booklet is available in both English and Spanish.

“Are You Working on Your GPA or Your BAC?— Top Ten Myths About Alcohol.” Geared to college-age students, this poster includes a tablet of tear-off sheets featuring 10 of the most common myths about drinking. Some of those myths include: “I can sober up quickly if I have to,” “Beer doesn’t have as much alcohol as hard liquor,” “It’s okay for me to drink to keep up with my boyfriend,” and “I can manage to drive well enough after a few drinks.” Research-based facts are given to correct these common misconceptions.

To order, write to: National Institute on Alcohol Abuse and Alcoholism, Publications Distribution Center, P.O. Box 10686, Rockville, MD 20849–0686. Fax: (703) 312–5230. Full text of “Make a Difference: Talk to Your Child About Alcohol” is available on the World Wide Web at http://www.niaaa.nih.gov
